Feel free to use my models for anything but profit.

Ilan Garibi started to fold at age 11. He became a creator at age 42. Today, he is the founder of Origamisrael. He also leads the Convention for Creators (CFC), and the Origami World. He folds metal and wood, and does this for a living, selling his works of art. He teaches Origami and is the author of four origami books, and four puzzle books.

Add elements to your site, such as dedicated Image galleries, Video gallery, titles, etc.

Reorder elements by dragging the 6-point icon.

The screenshot shows the 'Profile Page Builder' interface. At the top, there is a yellow box with the heading 'Publish My Custom Profile Page' and a checked checkbox 'Publish my custom page'. Below this is a list of 'Content Blocks' including Hero Slider, Text, My Featured Work, My Books, My Diagrams, Image Gallery, and Teaching Experience. A green circle highlights the 6-point drag handle icon next to the 'Text' block. A blue oval highlights the 'ADD CONTENT BLOCK' button at the bottom of the list. An 'Add Content Block' modal window is open in the foreground, showing options for 'Section Title', 'Hero Slider', and 'Text'. A 'SAVE' button is visible on the right side of the page.

ADD CONTENT BLOCK to Content Block

Add Content Block

Section Title

Section titles give you an opportunity to break up your profile into different sections. By using this element, a Menu bar will be rendered at the top of your profile with links to each section you add. For example you can have three sections: 1. About Me - with a text block below the section; 2. My Work - with your Books, Diagrams and maybe a photo gallery; 3. Tutorials - below this could be a Video Gallery of Youtube or Vimeo videos. Adding these three Section Titles will then render a menu with the following links: About Me, My Work, Tutorials.

Hero Slider

This is similar to the main image slider on the CFC homepage. Uploaded images will be scaled and cropped to 1320 px wide by 640 px tall. Use the little Plus symbol on the image to set a focal point for the cropping. Each slide is clickable to show the full uncropped image.

Text

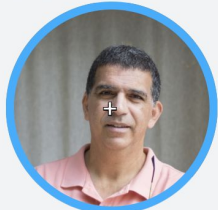

Renders a chunk of text. Use this for general paragraph content.
