Paper: *hexagon cut from a square of at least 20 cm (I use 21 cm)*

Recommended: *kraft paper (natron), approx. 90–100 g/m² – strong and holds creases beautifully*

Finished star: *approx. 0.4 of the hexagon's width*

Level: *advanced (Complex)*

Folding time: *about 1 hour*

This step is demanding because there is little space and you are folding several layers at once
TIP: you can do it earlier, right after step 35 - it is much easier there.

Finish BACK

Finish FRONT
