4 Pleat the paper through both layers, then unfold completely.

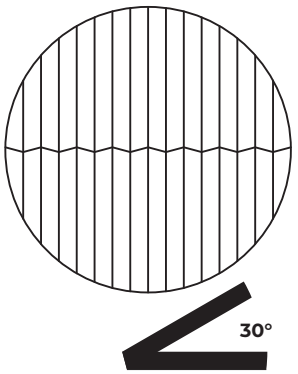

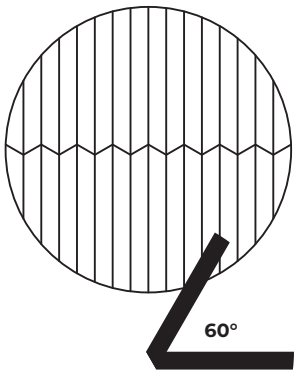

5 Keeping the model slightly open, gently re-press the paper along the spine, pleat by pleat.
Scan the QR code to see a video.

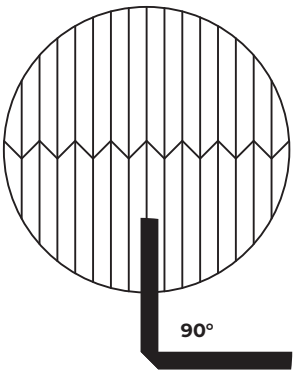

6 This is the side view of the collapsed model. Shape the shell by spreading the pleats along the raw edges and pinching along the folded edge.

NOTE The crease pattern above represents a shell open at 45°, but the exact angle can vary.

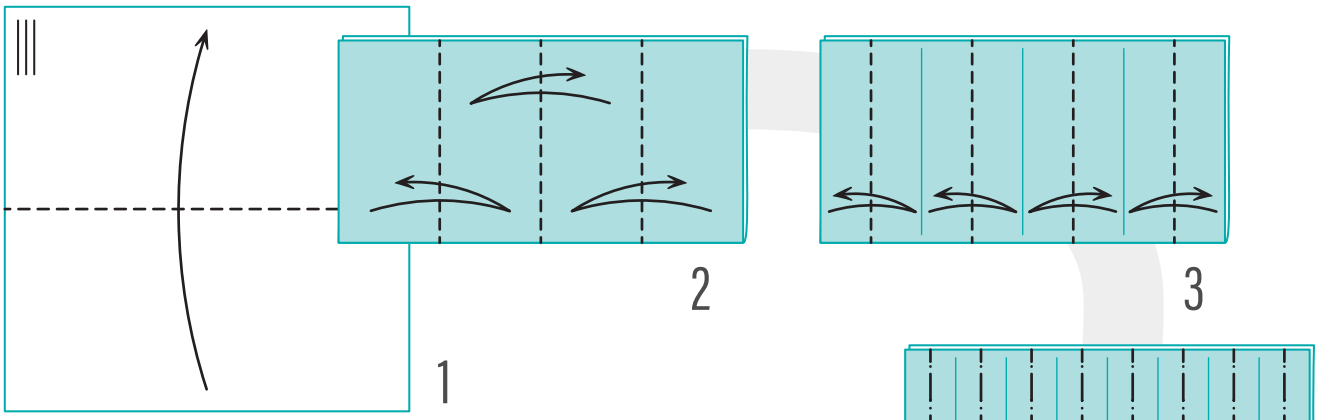

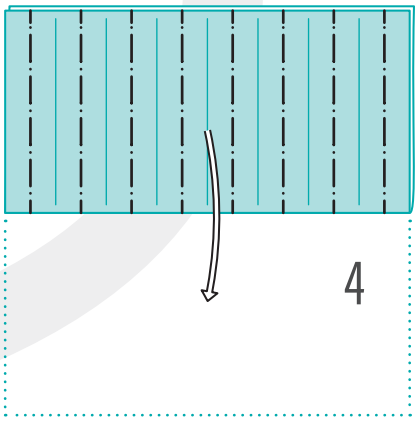

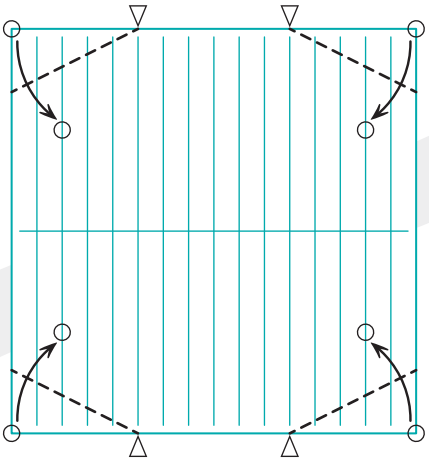

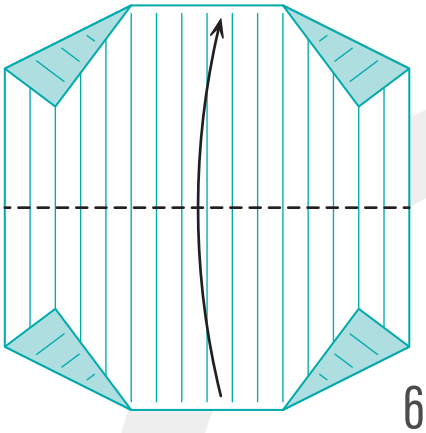

VARIATION FROM SQUARES

Paper: 12–15 cm square.

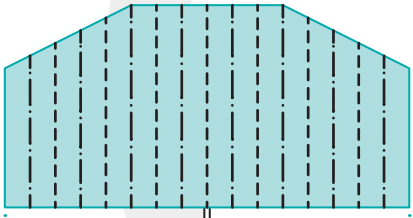

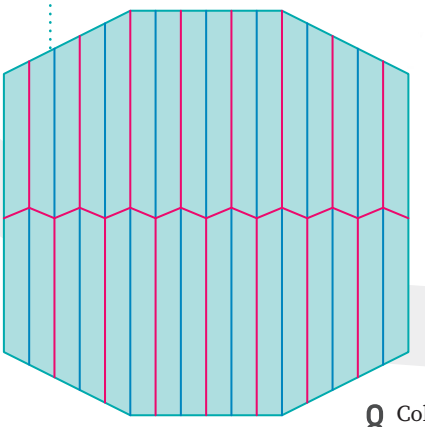

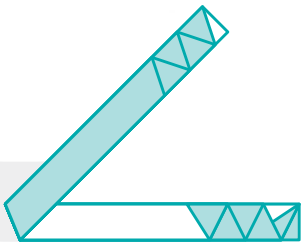

7 Pleat through all layers, then unfold.

8 Collapse and shape the model in a similar way as the main version, see steps 5–6 on the previous page.
