Por Julián Santiago

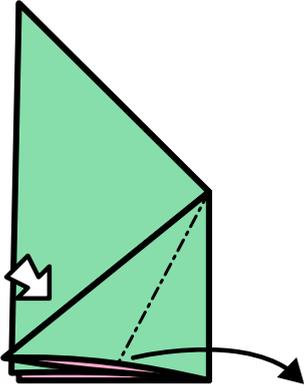

Este eficiente y sencillo corazón posee un broche prensil en su reverso. Esto le da una gran versatilidad, permitiendo que sea usado como gafete o colgado en una guirnalda.

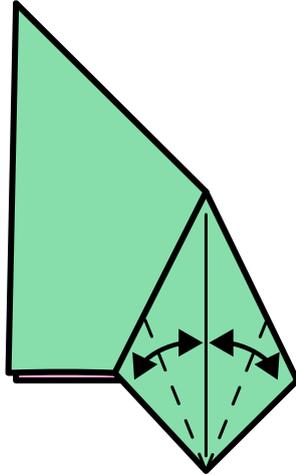

1. Plegar por la diagonal.

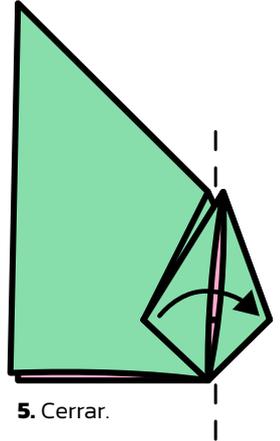

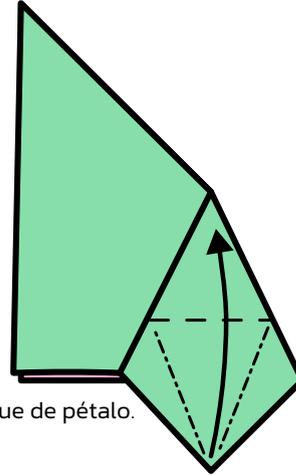

2. Llevar la punta inferior al lado opuesto.

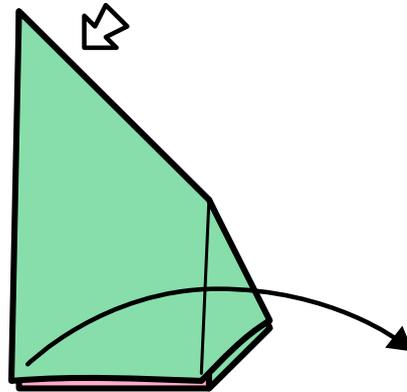

3. Aplastar la solapa triangular.

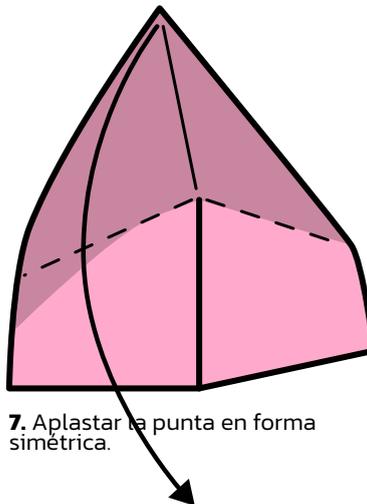

4. Pliegue de pétalo.

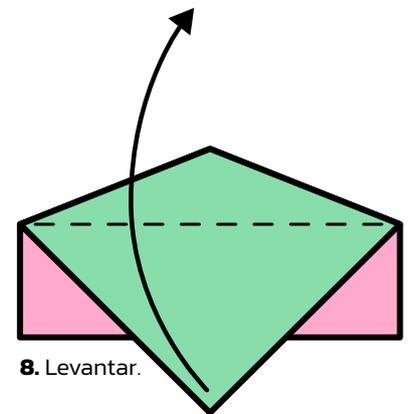

5. Cerrar.

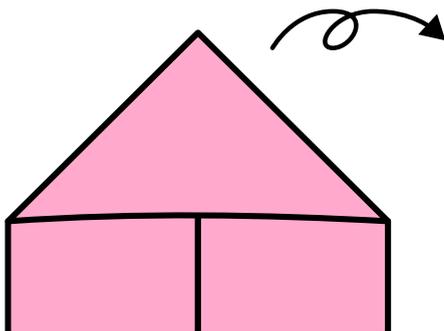

6. Abrir al medio.

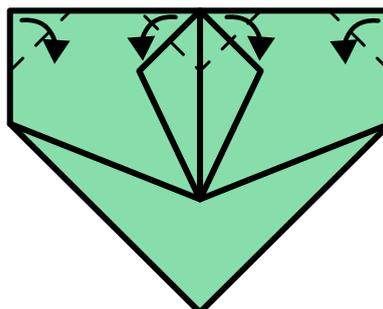

7. Aplastar la punta en forma simétrica.

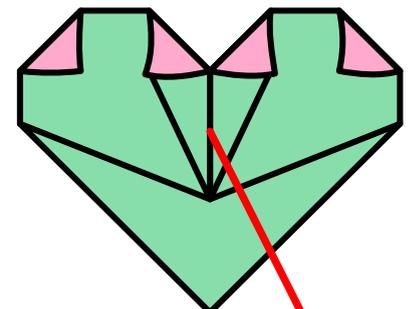

8. Levantar.

8. Voltear y rotar.

9. Plegar las cuatro puntas hacia adentro y el modelo está terminado.
