1 (Monotone paper preferred)
Begin with a triangle from half
of a square. Valley-fold and
unfold, then flip over.

2 Pick up the center crease
and fold it to the edge to
bisect the angle.

**3** Valley-fold the top
layer down and unfold.

6 Pick up the center crease
and fold it to the edge.

5 Valley-fold the top layer
and unfold.

4 Pick up the center crease
and fold it to the edge.

7 To add more levels, continue to
repeat this process starting at step 3.

8 Gently stretch the design out to
make it 3D and rest it on its side.

9 The model is now complete!
