21 (Reference points viewed from the top)
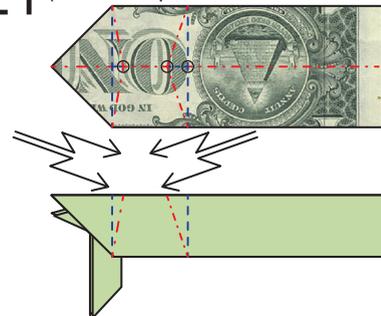

Crimp fold using the reference points indicated.

22
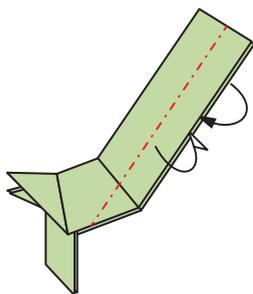

Fold the edge almost to the center. Leave a small gap of about 1 mm.

23
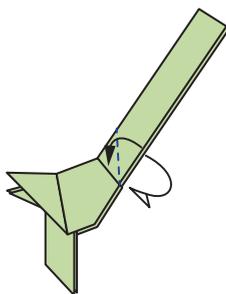

Outside reverse fold, edge to the edge.

24
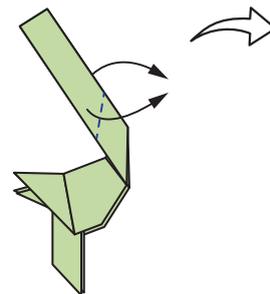

Outside reverse fold. No reference points. See next step for proportions expected.

25
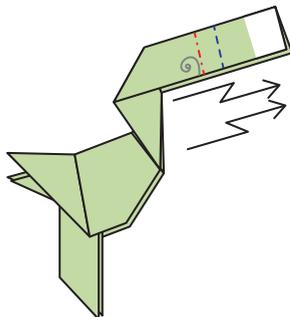

Crimp fold. The mountain fold should be right next to the eye swirls. And when the crimp is made there should be only the white border showing where the beak is.

26

(View from inside)
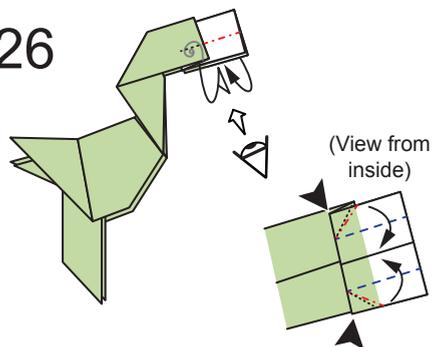

Fold the edge inside, squashing the sides.

27
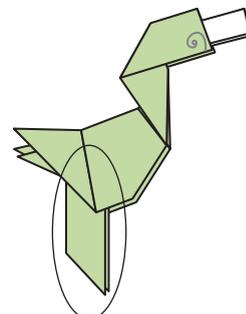

Details of the feet next.

28
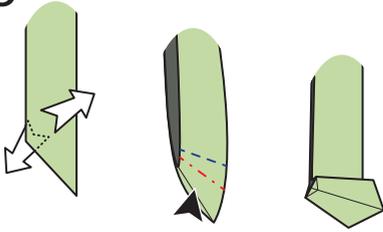

Open the layers slightly, collapse the base creating a pentagonal shape.

29
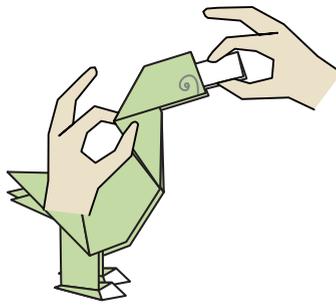

For the final shaping, round the chest. Hold the neck and push down the beak down to create a triangular shape inside the head.
