

Alligator

Julie Juniper

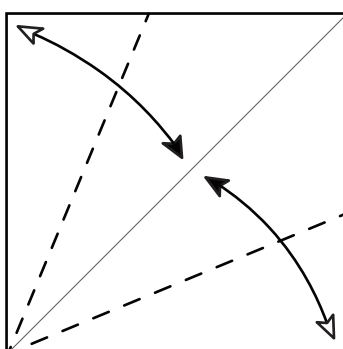

Paper: 15cm - 25cm. Tant and kami work well. Paper should be colored on both sides for best results.

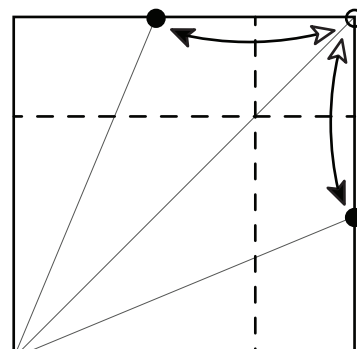

© juniperorigami

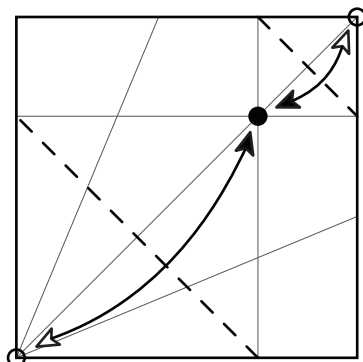

1. If using kami, start with white side up. Valley fold and unfold one diagonal.

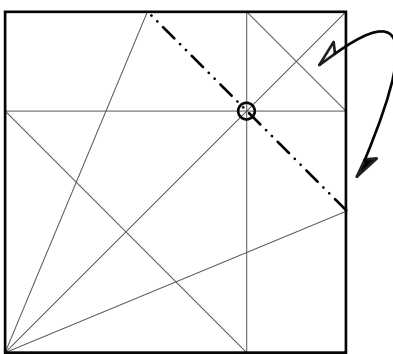

2. Kite fold and unfold.

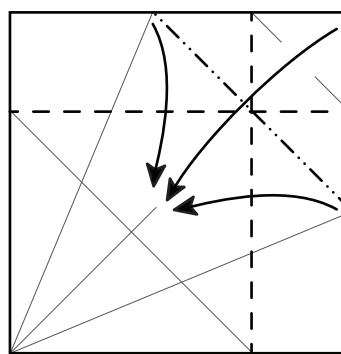

3. Fold corner to the crease and unfold. Repeat.

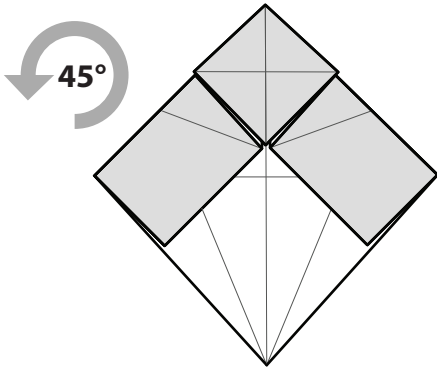

4. Fold two corners to the intersection and unfold.

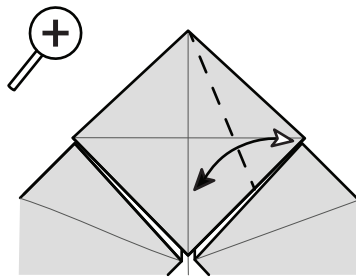

5. Mountain fold through the intersection and unfold.

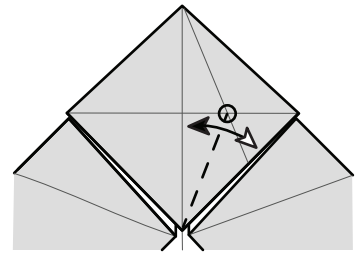

6. Collapse a preliminary fold using existing creases.

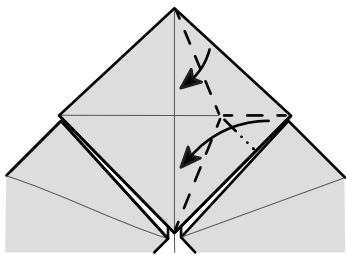

7. Rotate 45 counter-clockwise.

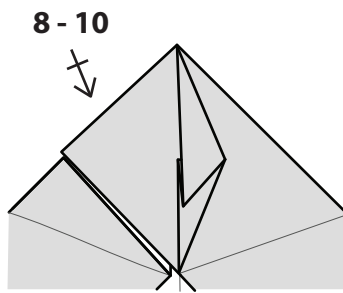

8. Fold top edge of the top flap to the center and unfold.

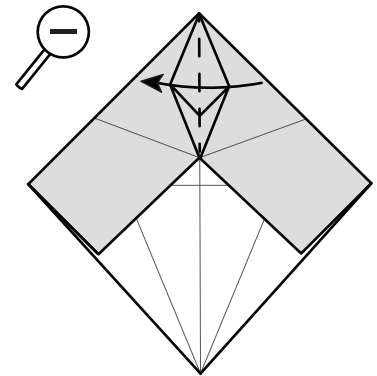

9. Fold bottom edge of the top flap to the center and crease up to the previous crease.

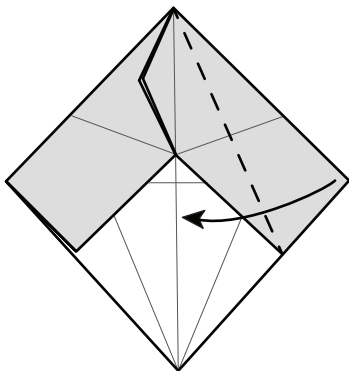

10. Collapse a rabbit ear using existing creases.

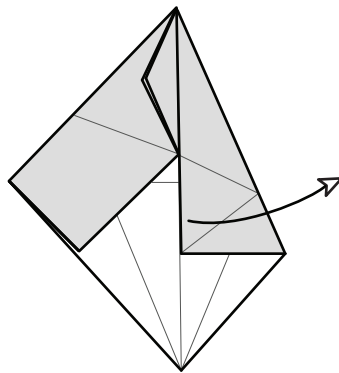

11. Repeat steps 8 - 10.

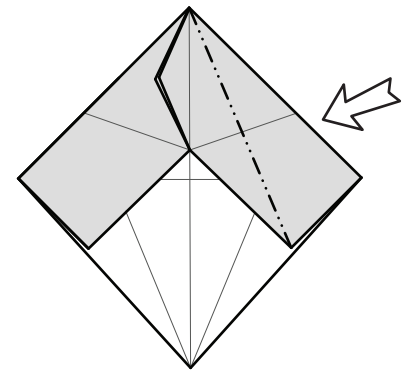

12. Fold top layer to the left.

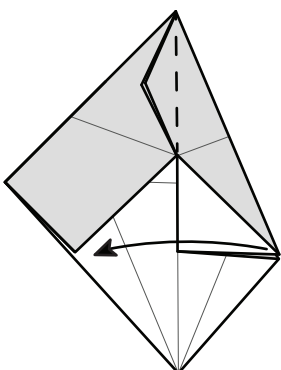

13. Fold edge to the center.

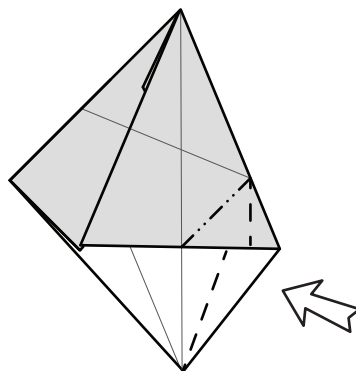

14. Unfold.

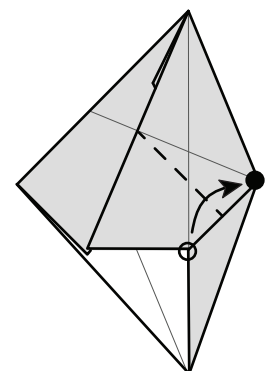

15. Reverse fold the flap inside.

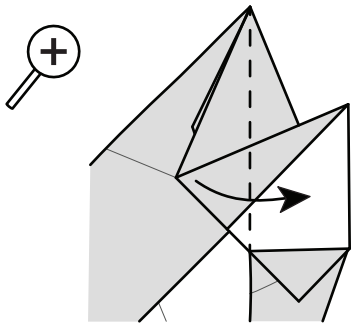

16. Fold top layer to the left.

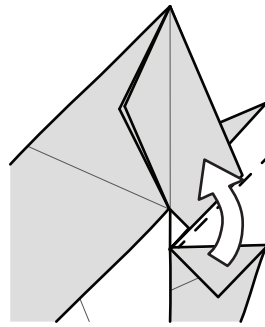

17. Reverse fold on existing creases.

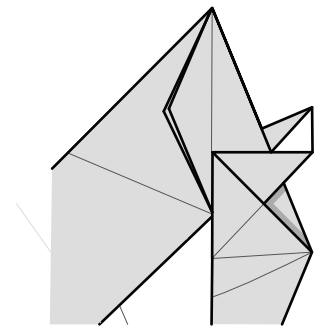

18. Fold indicated corner of top flap to the indicated point.

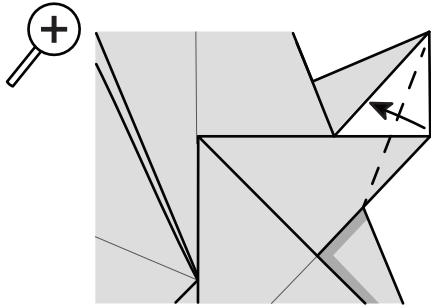

19. Fold top flap back to the right. Don't let the right side slide out.

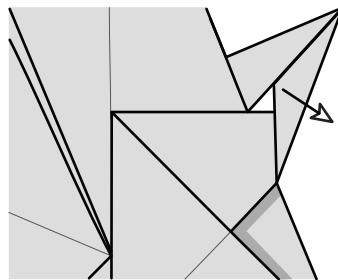

20. Wrap a single layer around edge. Spread up and flatten.

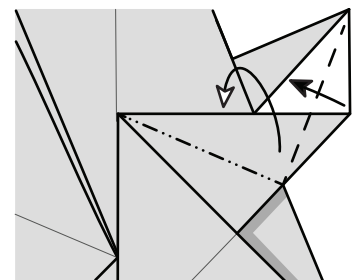

21. Result.

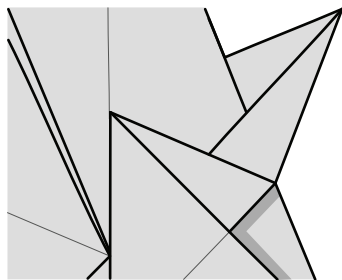

22. Fold edge to edge to point the toe.

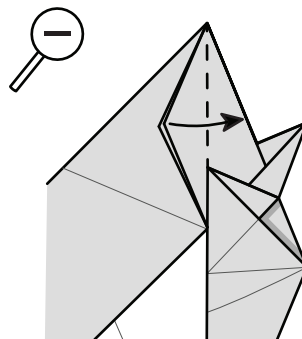

23. Unfold.

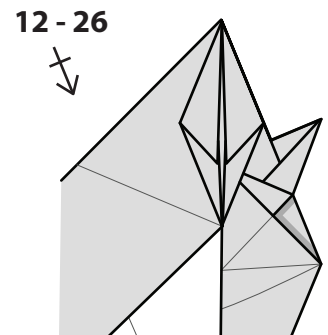

24. Swivel fold, tucking the loose paper behind.

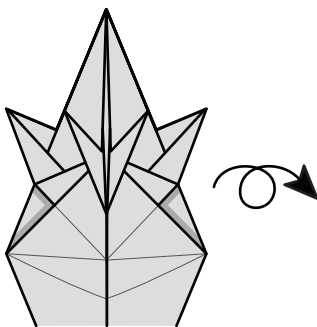

25. Result.

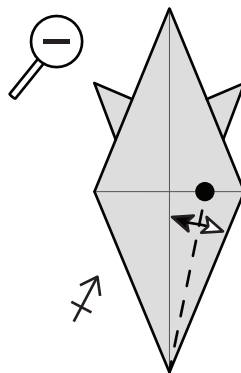

26. Fold top layer to the right.

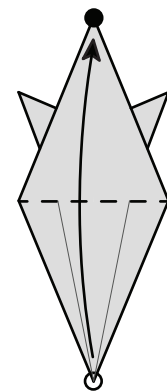

27. Repeat steps 12- 26.

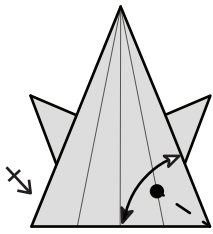

28. Result. Flip over.

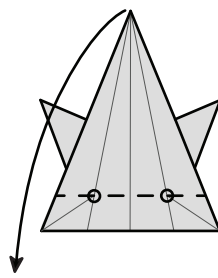

29. Fold edge of tail to the center up to the crease. Repeat.

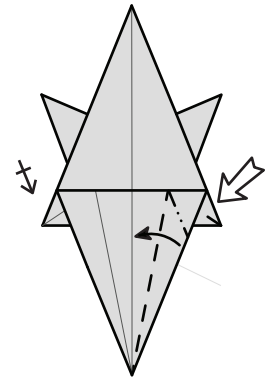

30. Fold the model in half.

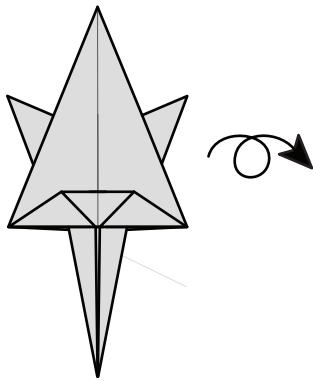

31. Valley fold the tail down at a bisector, and crease up to the crease made in step 29. Repeat.

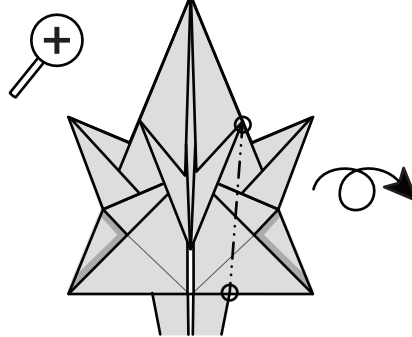

32. Valley fold the tail down along a crease that passes through the intersections of the folds from steps 29 and 31.

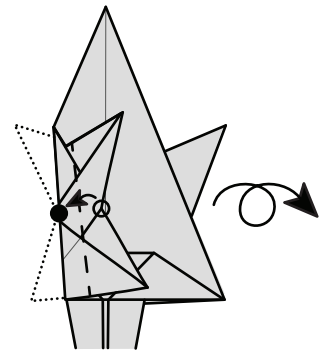

33. Swivel fold on existing creases to narrow the tail. Repeat.

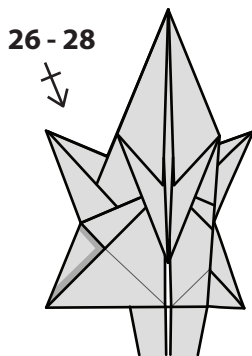

34. Result. Flip over.

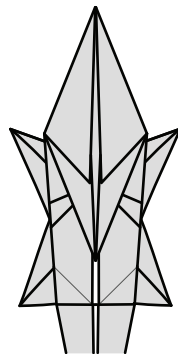

35. Mountain fold through all layers between the two indicated reference points. Flip over.

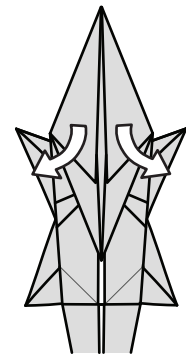

36. Valley fold so that the indicated point between the legs rests on the outer edge, and the legs are even in size. Pinch firmly to crease. Flip over.

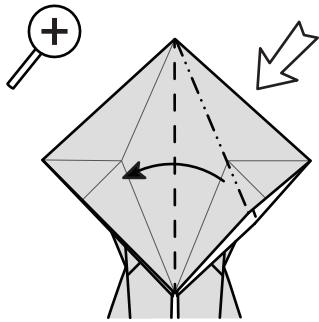

37. Repeat steps 26 - 28.

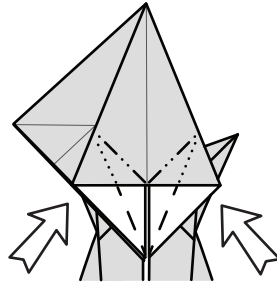

38. Result.

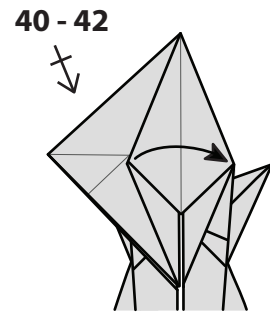

39. Unfold the rabbit ears of the head.

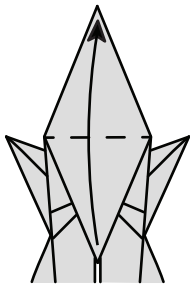

40. Open right flap and squash to the center.

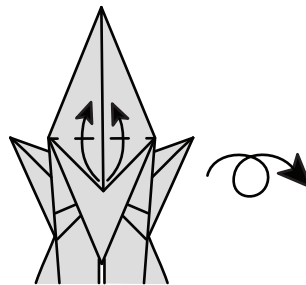

41. Petal fold on existing creases.

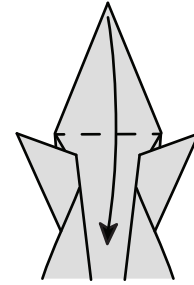

42. Fold top layer to the right. Repeat steps 40 - 42.

43. Fold the long flap forward.

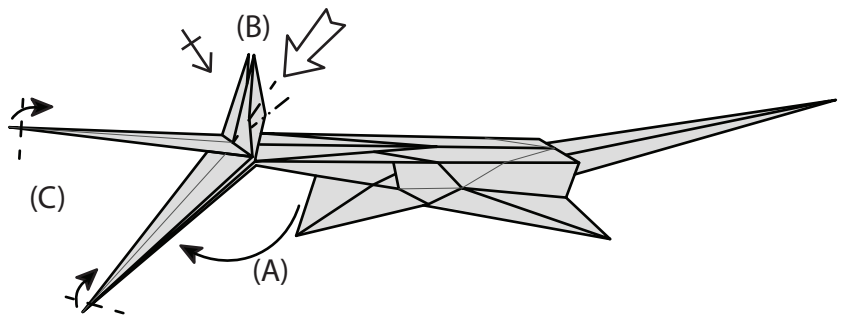

44. Fold the two short flaps forward and crease firmly. Flip over.

45. Fold top layer down as far as it will go and crease firmly. This fold should help keep the layers of the lower jaw together in the completed model.

- 46.** A. Bring the lower jaw forward.
 B. Open the short flap from the outside edge and squash fold, making a soft crease to shape the eye. Repeat.
 C. Valley fold the tips of the upper and lower jaws to taste.

47. Finished!
